Garrison's History of Medicine

This book presents the history of medicine from the earliest ancient and primitive times, on through Egyptian medicine, Sumerian and Oriental medicine, Greek medicine, the Byzantine period, the Mohammedan and Jewish periods, the Mediaeval period, the period of the Renaissance, the revival of learning and the Reformation; the Seventeenth Century (the age of individual scientific endeavor), the Eighteenth Century (the age of theories and systems), the Nineteenth Century (the beginning of organized advancement of science), the Twentieth Century (the beginning of organized preventive medicine). You get in this one volume all the important

facts of medical history. The *modern period* is exhaustively treated to date, one-half the volume dealing with the Nineteenth and Twentieth Centuries. You get a *biographic dictionary* of the men who have "done things." You get an album of *medical portraits*. You get the *social and cultural phases* of each period. You get a complete *medical chronology*—data on important diseases, drugs, therapeutic procedures, operations, etc. You get *bibliographic notes* for collateral reading, and a series of *test questions* of great value. You get a work that will stimulate your interest in the picturesque aspects of medicine and in the personalities of its great leaders.

Octavo of 763 pages, with many portraits. By FIELDING H. GARRISON, M.D., Principal Assistant Librarian, Surgeon General's Office, Washington, D. C., and Editor of the "Index Medicus."

Cloth, \$6.00 net; Half Morocco, \$7.50 net.
